For the best start for one day old chickens

IntraChickpaper

The first days in the life of a chicken are crucial. Only if a young chicken can quickly consume sufficient feed and water, will the growth pattern in the following weeks be successful. A high quality chicken paper is indispensable in this process. So, make Intra Chickpaper your choice; a chicken paper that has already proven its success in 60 countries.

Intra Chickpaper works quite simply. The paper is rolled out under the drinkers and sprinkled with chicken feed. The rustling sound of chickens walking on the paper attracts the attention of the other birds. In this way they also easily find water and feed. The fact that the paper absorbs droppings quickly makes the environment of the chickens super hygienic. This prevents the chickens from pecking at the droppings.

Advantages of Intra Chickpaper

- Strong
- Light-weight
- Easy to handle
- 100% bio-degradable
- Super absorbent
- With roughened surface to prevent claw problems
- Hygienically packed
