

more, larger, uniform piglets

DanTabs®

+ 1 piglet

100g larger

Believe it or not. 2 times a day, in 5 days, there will be a miracle.

- ★ Higher number of born-alive
- ★ Heavier piglets born
- ★ More successful farrowings

How it works

DanTabs® ensure larger and more uniform piglets.

The embryos receive more blood in a more even distribution from the first cell division to the birth. This is achieved through unique composition of organically bound microminerals which enhance the blood transportation to the uterus. DanTabs® also enhance reproduction and reduce the number of empty days.
